CodeMetaSoft

Project description
[OSCARS 1st Open call](#)

Daniel Garijo (**UPM**)
Thomas Vuillaume (**LAPP**)

CodeMetaSoft: Aims and Objectives

- **Ease the adoption of [CodeMeta](#) as a research software metadata interchange format**
  - Analysis of the **current metadata adoption practices** in OSCARS Clusters software catalogues
  - Extend the [CodeMeta generator](#) with automated suggestions

- Ensure **metadata record consistency** and propagation
  - Link to existing EOSC infrastructures and identifiers (OpenAIRE, ORCID, ROR, etc.)

- **Automate RS metadata** suggestions
  - Integration through GitHub actions

Results will be integrated in the [ESCAPE Open source Software and Service Repository (OSSR)](#), in line with EOSC projects guidelines ([EVERSE](#), [FAIR-IMPACT](#))
